German Airways Appoints Axel Sचेefe as Managing Director of Technology

Cologne/Bonn, March 30, 2026 – German Airways GmbH (German Airways) has appointed **Axel Sचेefe as Managing Director of Technology**, effective April 1. With this appointment the company is specifically strengthening its technical organization and leveraging experience in combining strategic management with operational implementation.

Axel Sचेefe, a graduate engineer in aerospace, has many years of industry experience in aviation. Since 2007, Axel Sचेefe has held various leadership positions in the aviation sector, overseeing key areas such as fleet management and strategic technical procurement. In these roles, he systematically developed structures and processes and strengthened operational performance.

Most recently, Sचेefe served as Managing Director of the Estonian airline Marabu. In this role, he was responsible for the structural development of the organization and the stabilization of operational processes during a challenging start-up phase.

In his new position at German Airways, he will further develop the technical division, consolidate existing structures, and expand collaboration among the operational units. Against the backdrop of the technical division's growing importance, Axel Sचेefe will drive strategic development to systematically enter the third-party technical services market.

“We are delighted to have brought Axel Sचेefe, a proven industry expert, on board at German Airways. He will specifically strengthen the technical division, inject new momentum, and thereby make a significant contribution to the overall development of German Airways,” says **Maren Wolters, Managing Director of German Airways**.

With this addition to the management team, German Airways underscores its commitment to the targeted further development of technology as a central business unit of the company.

About German Airways

German Airways is Germany's second-oldest airline and an experienced provider of wet lease partnerships and charter services of the highest standard. The company operates a modern fleet of nine Embraer E190-100LR jets, which are deployed throughout Europe both in wet-lease arrangements for renowned airlines and in individual charter flights for discerning customers. German Airways is a member of the International Air Transport Association (IATA) and the European Regions Airline Association (ERA) and is committed to the highest standards of service, safety, and performance.
