Kolibri360 to take over logistics operations for a West German consumer electronics company starting August 2026

A key strategic milestone in the further development of Kolibri360's fulfillment business

Cologne, June 15, 2026 – Zeitfracht Medien GmbH / Kolibri360 ("Kolibri360") and a leading West German company in the consumer electronics sector and one of the leading providers of mobile communication solutions have agreed on a comprehensive partnership in logistics and fulfillment. Starting in August 2026, Kolibri360 will take over the logistics operations for the new customer. The partnership includes goods receipt, warehousing, order picking, shipping, and returns management, thereby covering the entire logistics value chain in Europe.

In a further step, the customer's entire aftersales service is also expected to be transferred to Kolibri360 by the end of the year.

The takeover of logistics operations for the West German company marks an important strategic milestone in the further development of Kolibri360's business. Through this mandate, Kolibri360 gains an established provider in the consumer electronics and household products sector as a customer and significantly expands its third-party fulfillment business. The collaboration confirms the company's strategy of consistently opening its long-established logistics and service business to customers outside the media market and establishing Kolibri360 as one of the leading fulfillment service providers in Germany.

Operations will be handled via the highly automated logistics center in Erfurt – one of the largest and most modern logistics centers in Europe. The combination of a conventional high-bay warehouse, an automated small-parts warehouse, and a powerful software architecture enables efficient and scalable operations in both B2B and B2C business – including short cut-off times, high daily operational currency, and strong expertise in managing seasonal peaks, as recently demonstrated during Black Friday and the Christmas business season.

For Kolibri360, the collaboration represents a further diversification of its customer portfolio into the consumer electronics, mobile communications solutions, and household products sectors, as well as a sustainable contribution to the revenue and earnings development of the fulfillment segment. Implementation will begin immediately, with operational launch scheduled for August 2026.

About Kolibri360

Kolibri360 is a brand of Zeitfracht Medien GmbH and stands for end-to-end logistics and fulfillment solutions along the entire value chain – from goods receipt, warehousing, picking and shipping to returns management and individual value added services. As an experienced B2B and B2C service provider, the company has held a firm place in the national and international logistics industry for more than 90 years. With over 1,650 employees at its locations in Erfurt, Stuttgart and Heeslingen, and one of the largest and most modern logistics centers in Europe in Erfurt, Kolibri360 supports businesses from startups to international corporations – in the media, electronics, consumer products and fashion & lifestyle sectors.
